

Intro to HTML & CSS

Objectives

By the end of this lesson you will...

- Have a development environment for creating a website
- Be able to define and explain:
 - HTML
 - CSS
 - Bootstrap
 - CDN
- Create a multi-page responsive website

Development Environment

Chrome

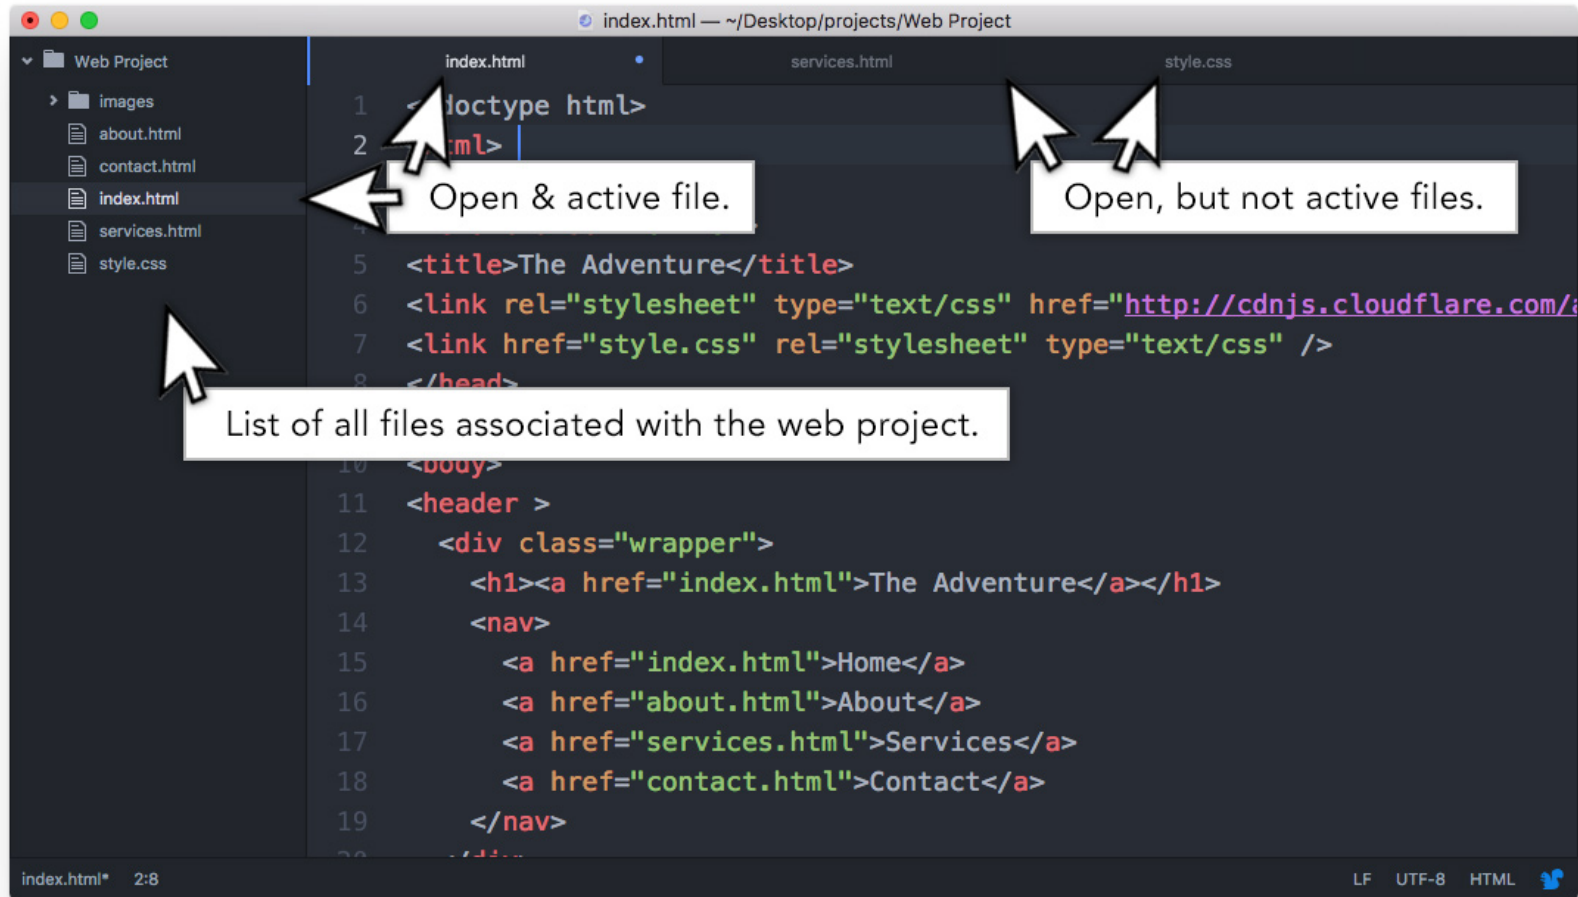

Make sure you have Google Chrome installed.

<http://google.com/chrome>

Atom

- Install Atom: <https://atom.io/>
- Atom is a text editor that makes writing code much easier!

Check In

- Do you have Atom installed? <https://atom.io/>
- Are you using Chrome as your browser?
<http://google.com/chrome>

Define & Explain

HTML & CSS, The Building Blocks

- **HTML - Hypertext Markup Language** is the structure/bones
- **CSS - Cascading Style Sheets** give your pages their look and feel

Think of a Car

HTML is like the doors, windows, tires. seats.

CSS is like the size, color, and other attributes.

Bootstrap

Bootstrap, quite simply, is a bundles of premade styles that developers can use to speed up web development.

CDN

- Stands for **content delivery network**.
- A CDN is essentially a computer that a lot of people access that stores the files people need.

Creating an Online Resume
